

GarageGo – Client Acknowledgement Letter

Project Title: GarageGo – Smart Garage Service & Emergency Repair Platform

Student Team: Digital Architects / University of Kelaniya

Date: 25/04/2026

To Whom It May Concern,

This letter serves to confirm that the student team has engaged in discussions with M.M HONDA, located at Urumpirai, regarding the proposed system titled “GarageGo – Smart Garage Service & Emergency Repair Platform.”

During these discussions, the garage owner/shared representative provided valuable insights into the current challenges faced within the vehicle repair industry. These discussions included common issues such as difficulty in finding reliable garages, lack of organized emergency roadside assistance, and inefficiencies in managing customer bookings and service operations.

The proposed GarageGo platform aims to address these challenges by introducing a digital solution that connects customers with nearby garages, enables emergency service requests with real-time tracking, and supports improved management of garage services and operations.

The information gathered from these discussions has been used as a reference to guide the system design and development process of this academic project.

This document is submitted as evidence of industry-level discussion and requirement gathering conducted by the student team as part of their academic work. No legal or financial obligations are associated with this acknowledgement.

Discussion Reference Details:

Garage Name: M.M HONDA
